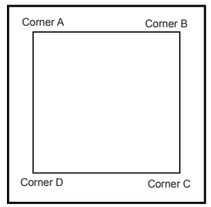
When assembled

SEG Graphic Installation



It is important to first insert graphic into each alternate corner then to the sides of the frame. If this is not done, graphic will not fit into the frame correctly.

Step 1
Insert corner A. Turn edge of graphic so silicon welt is perpendicular to face of graphic. Insert narrow side of welt with fabric to outside into the channel. Repeat for other side of this corner.

Step 2
Repeat Step 1 for opposite corner C, then insert corner B, followed by corner D, to complete the installation of the corners.

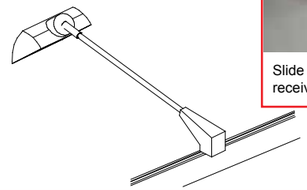
Step 3
Once all corners are inserted, press one silicon edge into channel from corners and work toward the center. Make sure welt is fully inserted into channel. Continue until all sides are done. Smooth out edges of graphic.

Graphic Removal

To remove the graphic from the frame, locate the fabric pull tab. Gently pull up on the tab to remove the fabric.

✱ Light Attachment

Lock Clip into Groove of Horizontal Extrusion, then slide Light onto Clip.



Slide light into light receiving hardware

✱ Monitor Mount Attachment

Slide V4 connectors into groove of horizontal extrusions; tighten set screws to secure.

Use bolts to connect Monitor Mount to V4 connectors.

Monitor Mount installs *over* SEG graphic.

Note: Use supplied 1/4” spacer between SEG graphic & V4, as shown.
